

KARIN WIRELESS FASTCHARGER

Description:

KARIN is an ancient nordic woman's name, which means "clean and tidy". KARIN fastcharger is designed by Danish design studio Nørgaard Design. "Design follows function" is a key point for Anders Nørgaard and his design team. The design approach is deeply rooted in the Scandinavian design tradition.

Techspech

10w wireless fast charger with cable and plug.

Universal input: 5.0V=2A, 9.0V=2V

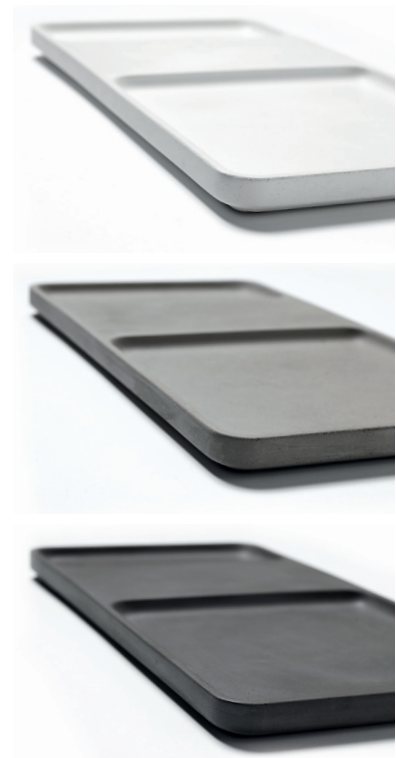

Universal Output: 5.0V=1.5A, 9.0V=1.0A

Compatible with Apple, Samsung, LG, Sony, Nokia. (From version Apple 8, Samsung Galaxy S8 LG G7, Sony Xperia XZ2 Nokia 8, etc.).

Size: 200 mm x 400 mm x 20 mm

Weight: 2.0 kilogram

The CONCEPT LIKEconcrete

KARIN is designed and produced in Denmark, by people passionated about this new organic concrete material.

Ground breaking production technique

Our moulding technology combined with a careful selection of stones make every product unique and with a completely smooth and almost silky surface.

Organic and green

We care for the environment. It is a part of our DNA. The concrete can always be released back into nature.

Funfact: Our concrete is +2 times stronger than normal concrete, but if crushed and mixed with potting soil it becomes the worlds best flower fertilizer.

How to clean:

Use a sponge with medium warm water (nano sponge for heavy cleaning). Wipe afterwards with cloth/ paper.
